SUMMARY

Software Engineering student with hands-on experience in software development, testing, and data validation. Skilled in manual and automated testing, SQL, and debugging, with familiarity in Agile methodologies and SDLC practices. Detail-oriented, proactive, and collaborative, with a strong interest in improving software quality and reliability.

SKILLS

Programming Languages: JavaScript, Python, HTML, CSS

Testing & QA: Manual test case execution, automated testing with Selenium, Pytest, debugging, error handling, defect reporting

Databases: SQL Server, MySQL, PostgreSQL, MongoDB

Software Development Practices: Agile, SDLC, Code Reviews, Documentation

Tools & Platforms: Git, GitHub, Figma, Docker (familiarity)

Soft Skills: Analytical Thinking, Attention to Detail, Problem-Solving, Communication, Collaboration

WORK EXPERIENCE

AI FINANCIAL

Data Analyst Co-op

Richmond Hill, ON

May 2025 – August 2025

- Shipped production-ready SQL Server stored procedures, views, and functions to calculate mission-critical investment performance metrics (IRR, XIRR, ROI).
- Reduced the runtime of ROI calculations by 70% through query optimization (clustered indexes, set-based logic, and temp tables).
- Developed Python scripts to automate return calculations, data validation, and ETL pipelines with checksums and snapshots.
- Built an error-handling and debug logging system, ensuring robust and secure software deployment.
- Delivered reports at both contract and fund-level performance, enabling business teams to make informed decisions.

PROJECTS

AIRLINE TRAVEL ASSISTANT | React, Node.js, Selenium, Google Flights API

- Built a full-stack airline travel assistant that fetches and compares real-time flight prices using Google Flights API.
- Developed a responsive React frontend with dynamic search, filtering, and pricing visualization
- Implemented a Node.js backend server to handle API requests, data processing, and secure communication
- Designed RESTful endpoints to manage flight search queries and pricing results efficiently
- Used Selenium WebDriver to automate end-to-end testing of the web application, validating user flows such as search filtering and results display.

CRYPTO PRICE TRACKER | React, CoinGecko API

- Developed a real-time cryptocurrency price tracker using React
- Integrated CoinGecko API to fetch and display live cryptocurrency prices and market data
- Designed an intuitive and responsive UI for a seamless user experience
- Implemented search and filter functionality to allow users to track specific cryptocurrencies.

SECURING FILE SHARING APPLICATION | Python, Django

- Developed a responsive web application using Python.
- Developed a robust application emphasizing secure file upload, download, and sharing capabilities
- Implemented encryption for data confidentiality and integrity checks to ensure file authenticity

- Designed and executed unit tests using pytest to validate functionality, including positive and negative cases

PORTFOLIO WEBSITE | HTML, CSS, JavaScript

- Designed and developed a personal portfolio website showcasing projects, skills, and achievements
- Implemented responsive design using HTML, CSS, and JavaScript to ensure accessibility across devices
- Optimized website load times by 30% by leveraging asynchronous JavaScript and minimizing HTTP requests, enhancing user experience and engagement

EDUCATION

SENECA POLYTECHNIC

Bachelor of Engineering - Software Engineering

North York, ON

September 2023 - Present

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Development Lifecycle (SDLC), Database Management Systems, Web Development, Operating Systems, Agile Software Development, Artificial Intelligence, Data Mining, Machine Learning
